

activity badges

Select badges for all of the activities **you plan to TEACH** classes for, not that you practice or are interested in. You will also have the opportunity to add specific badges to each class you create too!

about me

Create a meaningful description of you in a way that potential students get to know you and want to take your classes. If you have a lot to say, be sure to break things up into different paragraphs and maybe use a Grammarly browser plugin if writing is not your strong suit. See the **About Me Pro Tips** for a deeper dive on this and how to be even more successful.

qualifications

Use the qualifications section to list out all of the things that make you a great teacher. They can be your certifications but you should also list your experience and other relevant information

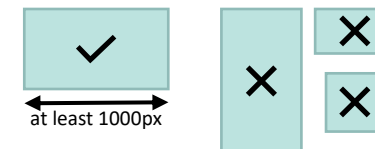

profile images

Make sure to use great photos that display your unique character and you doing what you love. Load all 5 images to your profile – this is the first impression that students get of you!

profile image sizes

For best results use high resolution landscape format images that can scale from a mobile phone screen to a computer display. We can help you with this!

profile portrait

Make sure you have uploaded a profile portrait photo. For best results use a high resolution landscape format image as in some parts of the app the profile portrait is shown as a circle and others as a full image. Use the following guide. We can help you with this too!
